A56 MP F&F

OVERVIEW

Amethyst A56-MP-F&F is a flexible, fast curing UV ink suitable for LED as well as Mercury Vapour UV lamps and designed for self-adhesive as well as flexible medias.

The A56-MP-F&F performs well in a demanding, high speed printing environment. The ink is NVC free ensuring the product is compliant with future regulatory requirements.

This formula is designed for compatibility across a broad range of print head models and features a superior colour gamut for bright, vivid images.

Provided the inks are used in regular applications, using suitable substrates, the printed images will not fade unduly for up to two years.
